Umut Öçgüder - iOS Developer

Turkey, Ankara, Çankaya 06530 • umutocgdr@gmail.com • +90 507 490 26 05 • linkedin.com/in/umutocguder

Experience

DIAS   Istanbul, Remote, Full-Time
 iOS Developer
                                                                             06/2024 - Present

- **DOA:** Contributed as an engineer to DOA, a major nationwide recycling initiative set to become the largest application of the Turkish government. Worked in a core Agile team using Swift, MVVM, and protocol-oriented programming (POP). Took part in critical feature development and integrations, including KYC (Know Your Customer) and NFC technologies.
- Also chance to analyze the code of: UTTS, İş ortağım
- Reference: Hasan Hüseyin Gücüyener - DIAS - iOS Architect

Arçelik via OBSS   Ankara, Remote, Full-Time
 iOS Developer
                                                                             09/2023 - 06/2024

- **HomeWhiz:** Contributed to the development of an IoT device connectivity app using Swift and MVVM architecture, incorporating MQTT protocols, within an Agile team. Spearheaded the transition to Agile methodologies and improved Swift code quality. My involvement encompassed various high-level tasks, particularly focusing on the design and implementation of new screens and environments.
- Reference: Özberk Öztürk - Arçelik - iOS Lead

Softtech   Ankara, Remote, Full-Time
 iOS Developer
                                                                             08/2021 - 09/2023

- All projects were developed using MVVM-C architecture and Swift. We operated with Agile methodology. I executed all required development tasks across all projects.
- **İşCep**: I had the opportunity to work on the Turkey İş Bank online banking application, which has over 1.8 million comments and a 4.6-star rating. I actively participated in component developments.
- **İş Faktoring- Fiba Faktoring**: These projects aimed to make check scanning easier with QR codes and allow online bidding for checks. I became the main expert on its details, frequently creating new screens and demonstrating a deep understanding of its operations.
- **İşbank Iraq - İşbank Georgia - İşbank London - İşbank Kosovo** : Developed native applications similar to İşCep for international branches.
- **İş Yatırım - Ünlü & Co**: Enhanced customer experience through NFC and video call integration, optimizing interactions and transactions.
- **Kayra**: Contributed to Softtech's SDK project for modularized component integration in various projects.
- **Triwi**: Involved in developing a women's health app to address basic health needs.
- Also chance to analyze the code of: Nays, Lunafi, Bayındır, Paşabahçe, ProEmtia, İşbank Deutschland, İş Leasing
- Received professional entrepreneurship training and represented Softtech as a speaker at various events like Bilmök
- Reference: Evren Yaşar - Softtech - iOS Architect

Education

Selçuk University   09/2017 - 08/2021
Bachelor's degree, Computer Science. GPA: 3.19 / 4.00
I completed an iOS internship lasting nearly a year and worked as an interpreter. Additionally, I participated in iOS
Bootcamps and hackathons.
